

BEYOND WHAT YOU SEE

Yacht & Marina Security in a New Reality

**SEE IT EARLIER.
UNDERSTAND IT FASTER.
BE READY.**

DANGER BEGINS BEFORE YOU SEE IT.

The advantage begins when small, separate signals can be understood before the situation becomes obvious.

01
ASSESS

02
ANTICIPATE

03
OBSERVE

04
UNDERSTAND

05
SUPPORT

06
PREPARE

IN SECURITY, TIME IS ROOM TO CHOOSE.

Time to verify information, change a route or berth, alert the crew, increase observation and prepare. Sometimes a few minutes of advantage are worth more than another device on board.

FROM INFORMATION TO UNDERSTANDING

The objective is not to collect more information. It is to understand earlier which information actually matters.

OBSERVE CONNECT ASSESS MODEL ALERT DECIDE

Intelligent analysis can identify repetition, connect events separated by hours or miles, highlight unusual combinations of factors and help assess possible developments.

ONE VESSEL. ONE SECURITY PROTOCOL.

Every yacht has its own routes, berths, crew, equipment, life on board and risk profile. Security is shaped around those realities.

- Risk Assessment
- Situational Awareness
- Communications
- Crew Readiness
- Emergency Procedures
- Route & Anchorage Planning
- Observation & Detection
- Critical-System Resilience
- Medical Preparedness
- Evacuation Readiness

PEOPLE BEHIND THE TECHNOLOGY

AGRON Security Support Center connects captains, yacht managers and security leads with trained specialists who can help assess changing conditions, correlate information, consider scenarios and support decisions.

Situation Assessment

Information Correlation

Scenario Review

Decision Support

Specialist Escalation

Technical Coordination

AGRON MARINA SECURITY

For marinas, the same principle extends across a wider environment. Separate events become more useful when they form one security picture.

WATER Vessels / approaches / anchorages

AIR Drone awareness / airspace activity

SHORE Access / perimeter / service areas

INFORMATION Awareness / correlation / escalation

WHAT ARE WE REALLY PROTECTING?

Privacy. Family and guests. Freedom of movement. Confidence on board.

Well-designed security is almost invisible on an ordinary day. When it is needed, everything necessary must already be ready.
